

Zachary Pressley

GTM & REVENUE OPERATIONS · SALESFORCE ADMINISTRATION · AI-ENABLED OPS TOOLING
(910) 690-0904 · zpressley@gmail.com · linkedin.com/in/zdpressley · zachpressley.substack.com

GTM Operations leader who builds AI-enabled revenue infrastructure from the ground up, engineering lead routing, designing territories, cleaning CRM data, and generating pipeline.

TECHNICAL SKILLS & TOOLS

CRM & RevOps Platforms: Salesforce (Admin, Flow, CPQ) · HubSpot · Fullcast · LeanData · Clari/Groove · Salesloft · Ironclad

Data & Automation: Clay · Python (pandas) · SQL/SOQL · Google Apps Script · JSON · APEX

Certification: Salesforce Certified Administrator (SCA) — issued June 2023

EXPERIENCE

Anaconda, Inc. · Remote

Senior GTM Operations Analyst

JAN 2026 – AUG 2026

- Identified a lead-routing coverage gap during Anaconda's LeanData-to-Fullcast transition and built a Clay table to intake, dedupe, merge, and account-match leads before routing them to the correct owner or round-robin group. Built to run two weeks, it ended up carrying live routing for three months while the Fullcast implementation stalled.
- Built an App Scripts algorithm in Google Sheets for 2026 planning that distributed accounts equitably across territories, accommodating Named Accounts and Company Hierarchy, allowing for dynamic territory changes while minimizing disruptions.
- Extended LATAM opportunities for AEs with an AI-powered product-market-fit search built on a custom industry-fit scoring model, pushing ICPs into the enrichment funnel to double potential contacts in the LATAM segment.
- Deployed a Clay AI agent to map company hierarchy across accounts, automating a workflow that ensured a trusted CRM source of truth for AEs and Sales Leaders.

GTM Operations Analyst

JUL 2024 – DEC 2025

- Engineered the cohort-tracking centerpiece of a company-wide Q3 2025 code-red push, building a Contact Roles framework that ensured every opportunity carried an assigned contact role and made ours the only team to hit its code-red goals that quarter.
- Rebuilt Anaconda's Deal Desk process from the ground up for sales leadership using Salesforce CPQ Flow to track deal value and route quotes to the correct stakeholder for auditable review; no formal process existed before.
- Cut 4 steps from the quote approval process by automating pre-approved contract clauses in CPQ that reps could self-add, getting quotes to customers faster and deals closed sooner.
- Redesigned account and KYC-opportunity distribution for the sales team during a Q3 2024 pipeline shortfall, reallocating coverage to reps and external partners to close the pipeline gap ahead of the company's \$150M Series C round at a \$1.5B valuation.
- Launched an automated meeting-booking flow for the BDR team, built on a custom Salesforce field schema, cutting booking time from ~10 minutes to ~2 minutes via lead qualification, AE assignment, and Slack notifications.
- Coded a Python-based account-matching engine, layering fuzzy matching with semantic search on local embeddings, in early 2025 for the GTM team, replacing manual account and contact dedup before Clay was part of the stack.
- Powered a company-wide Pipeline Generation Day (PGD) push by launching 7 partner campaigns (Snowflake, Databricks, AWS), then cleaned, deduped, and matched partner-provided account and contact lists (Crossbeam and direct-from-partner) in Clay before enriching top ICP titles with updated email, LinkedIn URL, and mobile numbers to drive outreach.
- Modeled a Google Sheets-powered capacity-planning tool that let leadership adjust variables like headcount, assigned accounts, and close rate to see the expected ARR needed to hit 2025 targets.

TrustEngine · Remote

Revenue Operations Analyst

FEB 2024 – JUL 2024

- Resolved billing discrepancies across the full customer invoice base, aligning Finance, Product, and Customer Success on accurate data.
- Automated CRM compliance monitoring for revenue stakeholders via Zapier, flagging data errors before they became downstream reporting issues.
- Developed a quarterly deal-analysis dashboard in Google Sheets for Sales Leaders, giving them a self-serve way to search and analyze deal data across past quarters.

Sales Operations Specialist

SEPT 2022 – FEB 2024

- Audited ~230 active customer contracts for the GTM team, surfacing thousands of data points that seeded a company-wide upsell/cross-sell strategy.
- Saved the company \$10,000 in tech and labor costs for the RevOps team by implementing duplicate-record rules and automated CRM data governance.
- Matched and merged HubSpot data into TrustEngine's Salesforce instance following a company merger, building a Google Sheets algorithm that cleaned, deduped, and consolidated a 900+ company addressable market across Finance and Banking.
- Owned Salesloft as TrustEngine's outbound engagement platform, configuring and maintaining it to support the full sales team's outreach.

Business Development Manager

JUL 2021 – SEPT 2022

- Enriched and analyzed outbound Salesforce data for the BDR team via ZoomInfo — early data work that led directly to my promotion into Sales Operations.

REVGEN NC, INC. · Raleigh, NC

Sales Development Representative

AUG 2020 – JUN 2021

- Prospected at a volume of 110 dials/day for the Account Executive team, converting outreach into client meetings worth \$110,000+ in ARR.

Athletic Club of the Sandhills · Southern Pines, NC

Recreation Coordinator

NOV 2017 – JUN 2020

- Revamped the ACS Recreation Soccer League into a customer-focused program for local families, increasing participation 15% and satisfaction 25% while directing 50 volunteer coaches.

SELECTED PROJECTS

Clay Enrichment Waterfall · tiny.cc/ClayEnrichmentWaterfall

- Designed a firmographic enrichment waterfall (employee count, location, partners, tech spend) with APEX-based dedupe automation and a credit-conscious account-prioritization strategy, built and ready to launch the day I was laid off.

Pantheon Leagues · pantheonleagues.com

- Architected a fantasy sports platform from scratch, building live draft and auction tooling, a custom league-currency system with its own salary-cap calculator, and a full migration of 12+ years of league history off Yahoo Fantasy Sports.

EDUCATION

North Carolina State University — B.S. in Sport Management
